Titan Story:

Founder and designer of Titan Scopes Leigh Cornish, has been an archer since the 1960's and has immense experience in both recurve and compound archery. He is an excellent field archer, having twice finished 2nd in World Field Archery Championships. In 1997 he won the IFAA Pacific Region Field Championship and has won 5 Australian Fita Field Championships & 4 Australian Fita Target Championships.

Having worked as an Engineer for 30 years Leigh left to start an Archery Dealership where he gained an intimate knowledge of archery equipment. Never satisfied with the quality and accuracy of conventional equipment, Leigh found himself having to modify his gear, providing him with a technical advantage over the world's best.

After many years of development Titan Scopes was born. It has been the unique combination of Leigh's experience in the field as an archer and off the field as a Dealer and Engineer that has led to the success of Titan Scopes.

As an endorsement to Titan's commitment to precision, quality and service, the world's best now choose to shoot Titan Scopes. We are proud to announce Olympic Gold medallist and World champion Simon Fairweather and David Barnes are shooting with a Titan.

Recurve Sight Pin Options

NOTE: Reticle Colour is not as shown but an iridescent orange/red.

Patent Design Pending

2000 Olympic Gold Medallist
Simon Fairweather
chooses to shoot Titan!

Features / Options:

- Eccentrically machined for strength.
- Bodies in black, blue, red or silver.
- Threaded rods in 8/32 or 10/32
- 0 power lens for Olympic style archery.
- Multi aperture O ring system.
- Optic fibre through the lens .0020" ,0.030"or 0.040" in red green or amber.
- Any Gunstar precision target reticle, fluoro orange or black. eg. small medium or large dot or circle.

Description:

A quality recurve scope is born. We have the worlds best namely the 2000 Olympic Gold medallist / 1991 World Champion Simon Fairweather and David Barnes choosing to shoot Titan. We use 'the best' quality 0 power coated lenses produced by Hoya offering amazing clarity and sharpness.

Designed in conjunction with David Barnes specifically for recurve Fita Olympic competition, this scope offers unique features. Multi "O" ring lens retention also varies the aperture size from 14mm, 13mm, 11.6mm down to 11.2mm in a few seconds.

- Any Gunstar Precision Target fluro orange or black reticule i.e. Stick on dots circles or + hair.
- Drilled fibre 0.030" 0.040" or 0.060" in red or green or amber.

Description:

With FITA and IFAA scores getting closer to perfect, the importance of aiming well is becoming more and more vital. The Titan Target scope is becoming the scope of choice by archers across the world, from beginners to world class competitors.

We use 'the best' quality coated lenses produced by Hoya Japan offering amazing clarity and sharpness.

Sleek and precise this Titan scope offers target, field and indoor archers the latest in scope technology. Laser centered lenses are unique to Titan, this locates the optical centre ensuring lens changes do not change the arrows impact point. You can be confident in removing or changing lenses during shooting.

Our "O" ring lens retention system enables fast and failsafe lens changes.

Titan scopes are eccentricly CNC machined from solid 6061-T6 bar ensuring superior strength.

TARGET SCOPE 1 3/8"

TITAN 3D SUN SHADE / RAIN SHADE

(Black only)

Velcro Attachment

Not in Use

Sun/ Rain from the front

Sun/ Rain from the Rear

Features / Options:

- Lenses 2x , 4x or 6x (0.25, 0.5, 0.75 diopter)
- RH in Black or Silver and LH in black only.
- Bubble in green,red or blue (green standard)
- Threaded rod in 10/32 only.
- Coiled Optic fibre with post 0.040", 0.030" or 0.020" in red, green or amber.

Description:

The Titan 3D scope has the size and clarity to capture all detail of a 3D target in the most demanding of conditions. Our Hoya lenses are crystal clear and are a pleasure to shoot even in wet conditions.

Titan's FIBRE COIL produces a brilliant fibre aiming dot.

As with our target model the Titan 3D offers archers the latest in scope technology. Laser centered lenses are unique to Titan, this locates the optical centre ensuring lens changing does not change the arrows impact point. You can be confident in removing or changing lenses during shooting.

Our "O" ring lens retention system enables fast and failsafe lens changes.

Titan scopes are eccentrically CNC machined from solid 6061-T6 bar ensuring superior strength.

SCOPE 1 3/4"
FIBRE COIL 0.025 or 0.040"
